Our Learning Centers are dedicated to providing computer training for seniors to help them better understand the basics of computers and how to use them on a day to day basis. We are committed to our community of seniors who want to learn all they can about their computer.

As a certified member of SeniorNet National, we offer computer courses for adults and seniors that include comprehensive hands-on training from basic to advanced computer skills. Our goal is to teach you what you need to know, using patient, experienced and friendly volunteer instructors and coaches, many of whom were once students themselves.

Our classrooms are designed for comfort and individual attention from both the instructor and their coaches. The desktop computers, like your home computer, run the Microsoft Windows operating system with the latest available software including Microsoft Office and Internet Explorer.

We have basic and intermediate computer training curriculums written for those new to using a computer as well as for those who wish to improve existing computer skills and acquire skills for new employment opportunities.

We offer several annual sessions and our course list changes regularly as we always include special workshops and seminars to help further your computer knowledge.

About SeniorNet…

SeniorNet is the nation's premier and most respected nonprofit organization specializing in computer and Internet education for adults and those in need. Since 1986, SeniorNet has enlightened more than two million Seniors by providing encouragement, lifelong computer learning skills and introduced them to new worlds to explore via the Internet. SeniorNet is based in Fort Myers, Florida, with approximately 5,000 active members, 30 Learning Centers which are staffed by more than 3,000 volunteers with locations throughout the United States (including Indian Reservations and underserved areas).
