

SeniorNet Introduction to Cyber Security

A Cyber Security course developed by SeniorNet through a sponsorship by AT&T.  at&t

Click NEXT below to find materials for a self-paced four lesson course that describes security concerns related to your computer and the Internet and provides information on methods, tools and software you can use to protect against security threats.

An instructor-led version of this course is offered at many SeniorNet Learning Centers. Check with your local [Learning Center](#) to see when the course is scheduled.

Also, participate in SeniorNet's [Computer Q&A discussion on Virus, Spam and other Cybersecurity Issues](#) to receive help from your peers.

Everyone is welcome to use our self paced materials thanks to a generous grant from AT&T to fund the development of this course.
