

American Foundation for the Blind (AFB) Launches AccessNote

American Foundation for the Blind App Helps People with Vision Loss E

New York (February 1, 2013) For the millions of Americans with vision loss looking for a simple, convenient

"Apple products have earned high points from us for their out-of-the-box accessibility for users who are

A traditional notetaker is a portable electronic device that enables users who are blind or visually impaired

In addition to being a low-cost alternative to traditional notetakers, AccessNote allows users to combine

This is the first notetaking app developed and designed specifically for users with vision loss. AFB evalu

What sets the AccessNote apart includes:

- **Seamless Navigation** . Customized keyboard commands make notetaking more intuitive and pro
- **Automatic Saving** . With an automatic save on every few keystrokes, notes will never be lost.
- **Cursor tracking** . When navigating among multiple sets of notes, users can always pick up
- **Unparalleled Simplicity** With a clutter-free interface, users can create, read, find, and sync, makin
- **DropBox Integration** . All notes, always on hand. DropBox keeps AccessNote in sync with the u
- **Compatibility with Bluetooth keyboards** . Optimized for efficiency with the Apple Wireless Keyboard

AccessNote was developed in conjunction with FloCo Apps and is available on the App Store(sm).
