

On Friday, October 23, the SeniorNet Computer Learning Center at the Springfield, MA Jewish Community Center hosted a Windows 7 Launch Party with the theme of "Photopalooza." Sandy Krasner, Coordinator of the Learning Center, demonstrated some of the new features of Windows 7 and the Windows Live programs, especially those having to do with photos. We learned how to download our photos, edit and email them using Windows Live Picture Gallery. A popular feature let us stitch some photos into panoramas.

Approximately 60 attendees included our volunteers and their guests as well as volunteers from the Springfield

City Center and the Enfield, CT Centers. Continental breakfast was served, and a fine time was had by all!
