

San Jose Almaden SeniorNet provides adults 50+ access to and education about computer technology and the Internet to enhance their lives and enable them to share their knowledge and wisdom.

SeniorNet is an international non-profit organization designed to teach our Senior citizens the ways of computer & the Internet. It is a program for Seniors, taught by Seniors, in small classes, at a speed and in language that Seniors can understand & follow.

More than 4,500 people work through out SeniorNet Learning Centers, as volunteer instructors, coaches, administrators, and web site discussion leaders, community supporters and technicians. SeniorNet would not exist without this network of volunteers who dedicate countless hours to helping others learn to use computers and the Internet.

All our instructors & coaches are Seniors just like the students ... they are all volunteers, some who have completed and learned from the program itself.
